

Synopsis: THE SCALING LADDERS AND THEIR HUMAN FREIGHT ARE DASHED FROM THE WALL AS BY A GIANT HAND, AND FROM THAT WRECKAGE THE SURVIVORS COME LIMPING BACK.

HAP-ATLA STARES UNEASILY AT THE SILENT FORTRESS. THE WELL-PLANNED ASSAULT HAS CRUMBLED AS IF BY MAGIC. . . . FOR NOT A LIVING THING HAS BEEN SEEN WITHIN THE WALLS!

HE ORDERS THE BUILDING OF A GREAT RAM FOR AN ASSAULT ON THE MAIN GATES, FOR HIS MEN MUST COME TO GRIPS WITH THEIR FOE BEFORE THIS MYSTERY SAPS THEIR COURAGE.

FROM THE WATCHTOWER KING AGUAR LOOKS TOWARD THE ENEMY ENCAMPMENT. SUNLIGHT FLASHES ON A POLISHED SHIELD: ONCE, TWICE. . . . A MESSAGE IS BEING GIVEN.

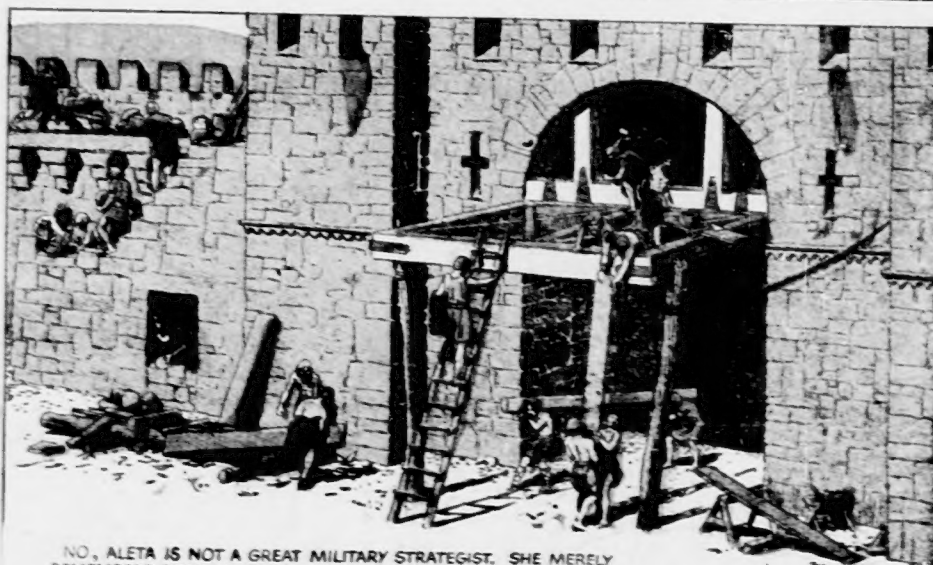

DEFENSE IS EASY WHEN IT IS KNOWN WHERE THE ATTACK IS DIRECTED. THE KING IS ORDERING A WALL BUILT INSIDE THE GATES WHEN ALETA APPEARS, LOOKING HER DISAPPROVAL OF THE KING'S PLAN.

"DOES NOT THE STRATEGY OF THE WARRIOR KING OF THULE MEET WITH YOUR APPROVAL?" ASKS THE KING, SARCASTICALLY. "AND IS THERE A BETTER ONE HATCHING BENEATH THOSE FRIVOLOUS CURLS?" "NO, SIRE," SHE SAYS DEMURELY, AND "YES, SIRE."

"NOW, IF YOU WERE TO SEAL WITH MASONRY ALL THE DOORS TO THIS COURTYARD IT WOULD MAKE A NICE PRISON FOR, SAY, FIVE HUNDRED MEN. YOU COULD TRAP THEM THUS. . . ."

NO, ALETA IS NOT A GREAT MILITARY STRATEGIST. SHE MERELY REMEMBERS SOME OF THE CUTE TRICKS HER TALL HUSBAND HAD BRAGGED OF USING.

NEXT WEEK - The Trap.

IT HAS BECOME THE
STAR OF OUR STORY.

CRIMESTOPPERS' TEXTBOOK

WOOL COTTON

WHEN CLOTHES HAVE BEEN BURIED IN THE EARTH, WOOL GARMENTS ARE MORE VALUABLE FOR CLEWS. REASON: COTTON DETERIORATES FASTER THAN WOOL.

AS BLOWTOP EMERGES FROM THE RIVER HE STEPS ON THE SHRUNKEN HEAD, FALLS AND KNOCKS HIMSELF UNCONSCIOUS ON THE ROCKS.

SEIZING THIS OPPORTUNITY, VITAMIN FLINTHEART RUSHES DOWN THE BANK AND BINDS BLOWTOP'S HANDS AND FEET WITH SOME RUSTY WIRE.

THEN BEFORE CALLING THE POLICE, FLINTHEART WADES OUT IN THE STREAM TO RETRIEVE THE SHRUNKEN HEAD, BUT

DEEP WATER! I'M OVER MY HEAD!

I-I CAN'T SWIM! IF I TURN LOOSE OF THIS CAN—I'M A GONER!

AND SO THERE THEY ARE! VITAMIN UNABLE TO COME TO SHORE, AND BLOWTOP, BOUND AND UNCONSCIOUS LYING ON THE BANK.

AND THE MISCHIEVOUS SHRUNKEN HEAD FROM BORNEO REACHES THE FASTER CURRENT AND BOBS OFF INTO MIDSTREAM.

MEANWHILE, AT HEADQUARTERS, FROM THE BORNEO MAN'S DESCRIPTION—THIS IS THE GUY.

THAT LOOKS SOMEWHAT LIKE THE MAN WHO BOUGHT MY NATIVE TROPHY—BUT NOT QUITE.

OH, I FORGOT—HE ALSO CARRIED A CANE.

H'M?—COULD BE—NO-NO. THAT'S OUT! I WAS THINKING THE GUY RESEMBLES VITAMIN FLINTHEART.

WHO? OH, NIX!—LISTEN, I THINK WE'RE ALL TIRED. LET'S HIT THE HAY!

WAIT! IT'S JUST A HUNCH! WON'T HURT TO TRY.

HERE WE ARE.

THAT—THAT'S THE MAN!

HUH? EH?

NOW WHAT DO WE DO?

LATER, A SHORT DISTANCE DOWNSTREAM.

NIGHT FISHIN'—FOOEY! I DON'T LIKE IT. LET'S GO IN.

WAIT A MINUTE. I'VE GOT MY PLUG FOULED-UP ON SOMETHING.

City Child
Is Crushed
By Truck

18-Month-Old
Baby Is Fatally
Injured at Play

While two small playmates yelled in belated warning, 18-month-old Stanley Woron was crushed to death beneath an ice truck this morning.

The accident occurred at 30:45 a.m. in a lane behind emergency housing built at the Edmonton Exhibition grounds, a few doors from the boys' house.

The boy was the son of Mr. and Mrs. Stanley M. Woron, suite 107, Hut 168, Exhibition grounds. The father is an employee at Canada Packers.

Royan Smith, 1970-85 avenue, driver of the Arctic Ice Company truck, beneath which the boy had apparently been playing prior to the accident, said he had no idea the children were near the vehicle when he started up after making delivery.

STARTING TRUCK
"I had just delivered some ice and was starting the truck," Smith said. "I could see some children playing ahead in the alley but I couldn't see any around the truck."

"Then I felt the right rear wheel go over something and I heard the kids screaming. I jammed on the brakes and got out. I saw the kid's car lying in the road and I thought that was what they were yelling about."

"Then I saw the little fellow's body lying there."

SUMMER DRIVER
Smith, a summer driver for the company and an engineering student at University of Alberta said he often had to chase children away from his truck when making deliveries to the crowded emergency housing district.

The victim's sister, Betty Ann, three years old, of the children standing beyond truck when accident occurred. She was not able to describe what she had heard.

There is another child, Gail, five months old, who has not yet been born.

CONSTANTLY RUNNING OUT
Mrs. A. C. Norlander, a neighbor, said parents had to be constantly running out when they heard traffic.

"There were no children here," she commented.

She said drivers making deliveries in the area drove slowly but children had nowhere to play except in lanes.

Markets At A Glance

By The Canadian Press
Stock markets in North America fluctuated anxiously today in response to the fast-developing Korean situation, while those in Europe showed signs of straggling.

TORONTO—Traders paused for breath of the Toronto Stock Exchange today following a sharp decline yesterday. Prices opened slightly higher but settled quietly into a narrow price range as the session progressed. Volume was about 2,500,000 shares.

Leading industrials chalked up gains ranging from fractions to more than a full point. Papers, utilities and a few refining oils brightened while food and textiles weakened.

MONTREAL—Traders were in regular active trading near the final hour on the Montreal stock exchange today. The market opened on a high note. A good demand soon developed and stock prices rallied. The U.S. group, the Pacific Northwest and the first hour trading pressure forced many gains to decrease or turn into losses.

Charters generally ranged in price, with the odd issue moving a point. Industrial volume was \$2,500 shares traded and mine had a turnover of 458,500 shares.

WIRE OUT CHANCES
Such a line would wipe out Alberta's chances of exporting any gas to the Pacific coast—by far the province's best market for its waste gas—natural gas reserves it wants to export.

Latest estimates place Alberta's gas reserves at over seven trillion cubic feet—far more than the province can ever hope to use itself.

First New Amsterdam Corporation is "very happy" that City Council has approved the Detweiler project which it is willing to negotiate on the changes suggested last night.

The Bulletin learned this today that a long distance telephone line with built in E. Dewiler and Clarence V. Pall, president of the corporation, in New York.

"It looks as if a group of gentlemen in Edmonton want to have their cake and eat it, too," said Mr. Pall, commenting on the five proposals for changes in the draft agreement.

The prolonged discussions show that a lot of people don't want to have their cake and eat it, too, in the future, or in the ultimate success of the project.

Management can't afford to be added with too great a number of conditions—unless we make the project a success, the potential investors aren't going to get their money back," he said.

GO BEFORE BOARD

RCN Ships To
Fight If Needed

From AP and BIP Despatches
President Truman today authorized the use of American ground troops in Korea.

The president announced in Washington he has authorized:
1—The United States air force to fly specific military missions into northern Korea wherever necessary.
2—"A naval blockade of the entire Korean coasts."

3—Gen. Douglas MacArthur "to use certain supporting ground units" in the efforts to turn back the Communist invader of southern Korea.

Almost simultaneously in Ottawa, the Canadian government today ordered the navy to speed three west coast-based destroyers towards Pearl Harbor to be ready to head for Korea if the United Nations asks for their aid in its police action against north Korean aggression.

Defence Minister Claxton said they will leave Esquimalt within the next week—and that their movements from Pearl Harbor will depend on UN directions. It will take them about a week to reach Pearl Harbor.

The navy said the destroyers going are the Athabaskan, the Cayuga and the Sioux and they each carry 200 to 225 men, are fully armed and "ready to go."

Reds Beyond Han River

Meanwhile, on the fighting front, an armored column of North Korean Communists has penetrated at least 13 miles south of the Han River, vital defence line in North Korea, it was reported tonight.

The drive is threatening the American headquarters position at Suwon, about 20 miles south of the river, an authoritative military source here reported.

The reverse came as southern troops fought desperately to stem the invasion until they received aid promised on an ever-increasing scale by the United Nations.

As American bombers ranged far into North Korea to strike at air bases and military installations unofficial reports said Gen. MacArthur will begin flying troops to Suwon from Kyushu today.

It was believed the first troops to be flown into action would be specialists, such as anti-tank gunners and engineers to bolster South Korean defences against armor.

Barges, Troops Bombed

The U.S. air force announced in north of Suwon, in extreme south, today Saturday (Korea time) that it had bombed a barge and a troop train on the Han River east and west of Seoul Friday. It reported "heavy damage" to barge and troop concentrations, as well as to tanks, convoys and highway installations.

The broad Han river is the principal natural barrier between the Red-captured southern capital of Seoul and the temporary southern capital at Taejon, 90 miles south of Seoul.

An earlier South Korean report said southern troops had re-entered the suburbs of Seoul on the heels of fleeing Communists. It said the city was still under attack, although it did not mention conflict with the news of a Red breakthrough southwest last Sunday.

Texas Company Makes Bid
For West Coast Gas Market

Danger that Alberta will lose the race for the rich Pacific gas for the main pipeline, specific northwest markets for its natural gas grew graver today.

While offers of companies wanting to build a pipeline out of Alberta are being made, a powerful U.S. group, the Pacific Northwest Pipeline Corporation, has formally applied to the U.S. Federal Power Commission for permission to build a \$200,000,000 pipeline from Houston, Texas, to the Pacific Northwest.

Police Seek Sick Man Missing Here

Police are seeking Martin Kowalski, 37, of Oakway, who was missing from St. John's ward of the General Hospital yesterday afternoon.

It was believed the man was treated for his home, 10 miles east of Edmonton.

Kowalski, suffering from pneumonia and reportedly with a temperature of 102 degrees, was wearing trousers, jacket, shoes and hospital gown. He was described as five-foot six inches tall and with grey hair.

Prizes paid in Alberta butter contests will revert to their May 31, 1950, level tomorrow.

Producers throughout Alberta and other parts of Canada accepted one cent less per pound for butter during the month of June as provided for in a seasonal adjustment and premium campaign for butter producers. The funds were \$2.50 a pound for first grade, \$2.00 a pound for second grade and \$1.50 a pound for third grade.

OWNERS OF THIS CONVERTIBLE have more than usual pride in it because it came off their own assembly line. Four brothers, Andre, Armand, Marcel and Morris Juchill, 8895-59 avenue, spent five months making the car. Body is of heavy steel on 1949 car frame and powered by 1949 motor. It has hand powered steel top. Unusual wheel permits five to sit in front seat. It was the first car they made and Andre Juchill said it would be the last.

Railways Report Improved Crop Conditions In Alberta

Improved Alberta crop conditions were reported today by the railways.

Beneficial rains occurred over the major part of the province, but the Peace River district still needed rain and in Edmonton area only scattered showers had occurred to north and west of the city in the preceding week.

Crops to northwest of Calgary, which suffered greatly from lack of moisture, were improved by precipitation which ranged up to 2 1/2 inches.

This was expected to bring improvement to germination of late sown crops in the Hanna area. About a per cent grasshopper damage was reported from Hanna east to the Saskatchewan border.

RAINS TO EAST
The area east of Edmonton enjoyed heavy rains. Watering, where it was urgently needed, reported up to two inches. Good showers, cool weather, improved conditions between Vermilion and Edmonton. Crops in this area stand up to 10 inches.

Although heavy rains fell, the Peace River country generally needs more moisture.

Gasoline 7 Cents Cheaper In City

Credit Given To Discovery Of Oil Fields In Alberta
Discovery of the Leduc and other Alberta oil fields is making an estimated saving of seven cents a gallon on gasoline to Edmonton motorists.

According to the Edmonton and W. D. C. Macdonald, president of the Western Petroleum Association, a joint meeting of the Alberta and Western Petroleum Associations in Macdonald Hotel, Friday noon.

"The reason for this is that if the new discoveries had not been made, there would be no credit given to the discovery of the Leduc and other Alberta oil fields."

Surprising Interest Shown In After-Life

There is a surprising interest in the question of the future life. Perhaps the reason is expressed in the words of Aunt Het, "I used to dread getting old, but I don't any more. The fix the world is getting in now, I'm plumb reconciled to bein' somewhere else."

Even more surprising is the interest not taken. There is a popular attitude which says, "Let us make the best of this life. Whether there is a future life or not is quite unimportant." Such agnosticism is another word for intellectual laziness for it destroys all great living. If life be a mere "mushy little pageant," if all our beauty and truth be a child's bubble, life is a colossal stupidity. I agree with Burke, "If immortality be untrue, it matters little whether anything else be true or not."

GIFFORD LECTURES

A prerequisite of the Gifford Lectures is that they be religious. Yet when MacNelly Dineen gave these lectures on "The Human Situation" and attempted to answer the question as to the ultimate reality and whether life was worth living, he came face to face with the problem of the future life in his final chapter, significantly entitled, "The Verdict."

"Think, if only for a moment, think," he implores us. If we proclaim to men that "Death is the only immortal," religion receives its mortal wound. We deny the world's rationality. For what reason is less rational than that this pen and paper should be more enduring than the earth?"

INTENSE CONSCIOUSNESS

I cannot think of one great soul who has not believed in the future life. Think of the intensity of this consciousness in the noblest spirits of the human race—Paul, Augustine, Luther, Calvin, Wesley, Francis d'Assisi, Tennyson, and Browning.

Dante, believed, "Of all brutal egotisms, that is the most foolish, vilest, and most pestiferous which holds that there is no life after this," and condemned to the inferno the philosopher who taught it.

Goethe thought that man to be dead even in this life who had no belief in another.

ONE VAST DEPOSITORY

J. D. Thompson held that, without immortal hope, life would be one vast depository of dead men's bones. "A ghastly assemblage, and

immense as the abidance, in which to believe in any kind of God would be worth no man's trouble."

Apart from some barbaric races, faith in immortality has been held by every people. The faith is indigenous to mankind native to the soul. Everywhere we find evidence of such a belief.

What is this future life? The Christian believes that it is a survival of conscious personality, although as Paul makes quite clear it is not the survival of this physical body. This is the reason why many people oppose cremation.

CELESTIAL IMMORTALITY

It has been unfortunately true as William James said that "religion for the great majority of our race, more than anything else, is a superstition." Religion is more than that, much more.

And I do believe that, "Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love Him."

Court Hearing Bakery Combine Case Adjourned

CALGARY, June 30.—(CP)—Special sittings of criminal court to hear an application by six Western Canadian bakers to quash charges against them were adjourned until Aug. 28.

Mr. Justice Boyd McElride decided on adjournment at the close of yesterday's session, when defence counsel said they would be unable to conclude arguments on the remaining 18 points by this afternoon. The bakers, who are charged with combining to fix the price of bread, are scheduled to appear in criminal court Sept. 11 in order to set a date for the trial.

No decision was given by Mr. Justice McElride on four points which have already been argued. One was that C. S. Blanchard, K.C., agent of the provincial attorney-general, acted without authority in laying the charge.

U.S. Military Men Seeking Tie With Western Defence

By John L. Steele

Exclusive to the Bulletin

WASHINGTON, June 30.—(UP)—Some high-ranking military officers sought today to swing Congress behind new moves to tie Spain and Western Germany more tightly into the western defense orbit.

Working quietly and informally, these officials are pushing for a 1.5-billion shift in Western Europe as far-reaching as the new defense pact in Moscow in Korea and Formosa.

Camera Crew Off To Arctic

MONTREAL, June 30.—(CP)—The 120-ton, wooden-hulled Virginia

came for its annual trip to the north. The ship sails July 6 on a voyage which usually takes four months and covers 10,000 miles.

Commanded by the Oblat Fathers, the little ship is commanded by veteran captain Tom Hanneman. It is making his third trip north in the vessel.

A three-man National Film Board camera crew will also be aboard, headed for a 15-month stay in the Canadian Arctic.

They have their eye on a belief that the defense of Western Europe largely depends on the use of German manpower and a base of operations south of the Pyrenees in Spain.

Gospel Temple Pastor Leaves

Rev. A. W. Rasmussen Accepts Call To Church In Chicago

Pastor A. W. Rasmussen, founder and organizer of the Edmonton Gospel Temple and the Temple Bible Institute of Edmonton has resigned his official position with the church and Bible Institute.

He will preach his farewell message to the church and members in Edmonton on Sunday at the 10:00 a.m. Gospel Temple, 1000 9th St.

The pastor came to Edmonton six years ago and took up residence here. Before coming here he was pastor of the Minneapolis Church of Christ.

CALL TO RETURN

The same congregation has asked him to return and take up the duties there again.

The Gospel Temple and Temple Bible School prospered under the leadership of Pastor A. W. Rasmussen and Rev. C. E. Jones, two past pastors in Minnesota.

During the six years past, 500 have been welcomed into the membership of the church and the enrollment of the Bible School has averaged about 100 students annually.

Many of the students are graduates of a very successful work at the field.

NEW BUILDING

The congregation of the Gospel Temple has plans underway for building a new modern building to house the church and Bible School. The building will be built on the present site where the temporary building now stands.

Rev. Rasmussen of Vancouver has been asked to supply a permanent pastor to the church. He will be serving here Sunday.

The public is cordially invited to attend all services.

Christian Science

"But Simon's wife's mother lay sick of a fever, and soon they told him of it. And he came and took her by the hand, and lifted her up, and immediately the fever left her, and she arose and walked." (Matt. 9:1-10:1)

"Now Master came out forthwith, and healed the sick. And he had the sick through him, wherever he came, is governed by God." (Mark 16:17-18)

Key to the Scriptures, by Mary Baker Eddy, 4th ed.

These are extracts from the Sunday School lesson of June 27th on Christian Science.

BLUE CROSS GROWS FAST

CHICAGO—Nearly 50,000,000 people in Canada and the United States have been insured by the Blue Cross organization, according to a statement issued by the organization's headquarters in Chicago.

The statement said that the organization's membership in 1964 was 48,000,000, an increase of 10 per cent over the 1963 figure of 43,000,000.

Weather Facts Freely Exchanged By Russia

By Philip Clarke

PARIS, June 30. (AP)—Russia is co-operating wholeheartedly with the rest of the world in the exchange of weather information, says Dr. Charles F. Brooks, director of Harvard university's observatory and one of the top weathermen in the United States.

"Hundreds of Russian weather stations furnish daily reports," he said in an interview. "These reports are telegraphed to central collecting stations which broadcast them in international code at agreed-upon hours."

Brooks said other eastern European countries and Communist China also broadcast weather reports. These are collected in Washington, London, Paris and other principal cities where meteorologists draw daily weather maps.

North Gets Big Project

OTTAWA, June 30.—(CP)—One of the Canadian Army's biggest construction jobs now under way is the Fort North, which is being built on the northern shore of the Northwest Territories and Yukon. The project is being supervised by the Northwest Territories and Yukon Radio System, which is building a new 300-air-mile radio station.

Army headquarters said today that 11 construction crews comprising nearly 200 men will carry out the work at widely-separated points. The biggest job will be construction of three houses at Fort Resolution, on the southern shore of Great Slave Lake and 700 air miles north of Edmonton. The houses will be for married army personnel and their families as well as staff quarters for the transport department and a new powerhouse.

NEW SCHOOL
In addition, planning of a new school erected this year ago also will be completed.

Other construction jobs in the Northwest Territories are proceeding at Fort Good Hope, Norman Wells, Fort Norman, Verity, Fort Simpson, Fort Providence, Inuvik, Repulse, Fort Reliance, Fort McMurray and Lethbridge.

Most of the work being done by the army crew is the construction of housing, new signal stations and the development of other establishments.

IN JUST A WEEK skies above Nanaimo Airport will be filled with aircraft—but they'll be model machines made by builders throughout the province keen on winning The Bulletin's all-Canada trip to international finals at Dallas, Texas. The second annual Alberta show will be July 9. Coupon to enter is on page 2 of today's paper. Expecting great things is W. Hall, 10722-65 avenue, model aircraft club secretary.

Ritz Parisian Pageant Uses Barge For Stage

By CARTER L. DAVISON
PARIS, June 30.—(AP)—An up-precursor cocktail party that started 100 years ago and then got out of hand will bring some 200,000 people and the brightest stars of the entertainment world to the banks of the Seine Saturday night.

This is the "Grand Night of Paris," which traditionally ends the spring season.

The show is for the benefit of orphans of soldiers and French resistance fighters. The Seine river, the Eiffel Tower and the sparkling Palace of Chateau form part of the stage setting.

Two floating stages have been built on barges on the Seine, one of them will hold the New York day Cultural Festival. Conference skilling show, "Holiday on Ice," here last night by Arthur Koestler, the other a ballet performance of British writer, on behalf of more than 100 prominent scientists, will have an actress.

Business Strong In First Half 1950

European Recovery Signs And United States Boom Helps

By Forbes Rhulde
Canadian Press Bureau Editor

Business in Canada continued at a hot pace in the first half of the year, cheered on by a virtual boom in the United States and signs of recovery in Europe.

Exports continued a merry, but even there increased sales to the United States largely overcame losses in overseas markets.

And a brighter economic picture and generally more hopeful and aggressive attitude in Britain and Europe, gave indication that the worst of the currency difficulties that have handicapped trade may be drawing to a close.

All around the western world there were signs that the emergency measures of the last few years, the stopgap here and the stopgap there, were fulfilling their purpose, and that the shaky structure of the post-war era was being welded into something solid.

POOL GOOD SIGN
Perhaps the most hopeful word to business anywhere are the current plans for a half-dozen European countries, including France and Germany, to pool their resources to form one great production area which may become not only an assurance of European recovery but of European peace.

The plan will bring competition, but it is the best recent hope for re-establishment of a healthy trading world.

As the first six months drew to a close, the world faced perhaps the greatest threat to its peace since the close of the war. The cold war of the last few years flared into fighting in Korea, with unforeseeable consequences. Whatever it means, it means no slackening in the pace of business and it almost certain to mean the opposite.

"It was about come, either soon or later, it would, of course, bring even greater demands on business and industry, though probably under a system of control which would make things of the last war look pale."

Parade Of Bands Will Open Games

Dances, Sports To Feature Edmonton's Scottish Show

It's a "lang" mile from the original Braemar Highland Games near Aberdeen, Scotland to Edmonton's Southside Athletic Park.

But it will seem no more than a caber throw when Edmonton's Highland Games Association stages the 1950's Grand Highland Gathering at Southside Athletic Park to-morrow with a pipe band competition to open the program.

Official opening, at 3 p.m., will be presided over by Mayor Sid Parson or another city council member if the mayor is unable to attend. Following will be grand parade of officials and members of Edmonton Boys' and Edmonton Girls' Pipe Bands.

Drumming contest and dances from highland fling to sailor's hornpipe will add traditional action and color to the gathering. A feature will be two top-drawn competitions on the infield green as part of full roster of track and field events for senior men and women, boys and girls, in "Alberta's largest athletic meet."

Three bicycle races will also headline the program. All signs point to biggest attendance and largest list of entries in history, officials stated.

Sander Back In Practice Again

CANTON, N.H., June 30.—(BUP)—Dr. Hermann N. Sander resumed his medical practice within minutes after being reinstated yesterday by the state board of medical registration which ousted him 10 weeks ago after his acquittal of the "mercy killing" of a cancer patient. Sander said he treated a patient who had heard the news over the radio. He said he plans to resume practice "fully" next Wednesday.

MONTREAL, June 30.—(CP)—Judge Ivesse Lagarde ruled yesterday that alcohol on a man's breath does not constitute drunkenness. He acquitted Roger Bousquet, arrested after his truck rammed a street car.

Vessels Collide

DOVER, Eng. June 30.—(BUP)—The 5,006-ton British ship *Uminston* Court and the 2,611-ton French tanker *Franchise* collided in a heavy fog near the Dover straits today. Crews escaped injury. The bows of both vessels were damaged.

Ex-U.S. Navy Vessel Starts Great Slave Run

Yellowknife Transportation Company ship *Expeditor* yesterday went into regular passenger-freight service on Great Slave Lake.

It was a strangely peaceful roll for the former U.S. navy vessel that landed industry in the South Pacific campaign in the last war. The *Expeditor* also made history one year ago by a voyage from Seattle to Great Slave Lake by way of Alaska and the Mackenzie River. The *Expeditor* will ply regularly Navy's crew roster.

Jap Sentenced To Life Term

LOS ANGELES, Admiralty Islands, June 30.—(Reuters)—An Australian war crimes court yesterday sentenced a Japanese naval ensign, Nanto Kondo, to life imprisonment for murdering between five and 10 Australian prisoners-of-war at Gasmata, New Britain, in March 1942.

IT'S A GAY TUNE, lad it is. There'll be fun and games to intrigue and amuse the people tomorrow—and not just those from Scotland, either—as Highland Games' Association annual gathering is held at South Side Athletic Park.

Highland Games Entries Settle All-Time Record

A couple of records have been shattered this year before the Highland Games scheduled for July 1 in South-side Athletic Park even get actively underway.

Grand aggregate of 344 entries for this year's highland games—pipe and drum, piping and dancing track and field events is biggest ever registered with Edmonton Highland Games Association.

RECORD ENTRIES
The 109 entries in dancing and piping competitions is a big gain over last year's 76 and 75 in track and field is increase over 1949's 66 contestants.

More names are expected to come in, officials said. Big contingent of 21 pipers and dancers from Calgary tops list of 46 outside entries in piping and dancing. Also sending contingents are Kimberley, BC; Wainwright, Alberta; Saskatoon, Sask.; Saskatoon, Red Deer, Bowden, Clondonnell, Wainwright and Inverness.

Competing for pipe band prize are RCMP Edmonton, Sturgeon, Cochrane, Inverness, Edmonton, Bowden.

New Tartans To Mark Long Games' Service

One of the brightest notes of this year's grand highland gathering in Edmonton's Southside Athletic grounds tomorrow will be the new Royal Stuart plaid kilts of commentator John Strachan.

What's more, the kilts are Edmonton made. Mr. Strachan reports. But they're not just a whim, mind you—they're to mark a very special occasion—the celebration of 21 years' unbroken attendance at the highland games for the veteran Scot.

He has been associated with the Highland Games Association since its inception and ken's weel the days when the event was a modest affair with remuneration on a grand scale, indeed.

But they weren't as grand as they are now in the one-day version, the commentator says. He's predicting a record gathering this year to continue pace set by 1949's 30 per cent increase over the previous year in both athletic piping and dancing events.

J. Carol Nalab, of CSM "Life With Luigi" has been made a member of the Pictorial Club, a popular figure in his traditional Scottish attire at the annual event.

CHIEFTAIN of Edmonton Highland Games Association is Thomas Campbell, a popular figure in his traditional Scottish attire at the annual event.

Russians Make Move To Shift War Tension

BERLIN, June 30.—(UP)—The Russians ordered today that West Berlin electricity and water produced in East Germany be shut off at midnight (3 p.m. MST) tonight.

Western officials were not alarmed because they have the facilities to produce enough electricity and water on their own.

But they said the move would put the city in a more precarious position if a new blockade followed.

NOT WHAT, BUT HOW IS POINT

DENVER, June 30.—(AP)—Little 14-month-old Gloria Susko bit her tongue, which was remarkable. But how she did it is the point.

Gloria's older brother and sister were playing with her baby sister on a bed at the Susko home. There was an open window next to the bed on the second floor of the house.

Gloria tumbled out of the window, bounced off the roof of the back porch and fell the distance of about 10 feet before landing on the ground.

The infant was rushed to hospital. Attendants examined Gloria carefully.

All they found was the bitten tongue.

Doctors took Gloria away from Korea by creating another situation here.

Twenty Canadians Enrolled In Alcohol Studies Course

BETTER LIFE HOPED AFTER RENT CANCELLED

WEST WARREN, Ill., June 30.—(AP)—An Italian immigrant who became a large landholder died yesterday and as a memorial to himself he left all of his tenants one week's free rent.

Gioseppe pastore, about 80, gave a note to an undertaker last month instructing: "That the week that I will pass in a better life all my tenants shall have that week free of rent and, in case any of them shall be one week in arrears, that week also shall be free and forgiven for my memory. This I demand from my heirs and relatives."

Three of them—Miss D. V. Nulian of Toronto; Evelyn H. Moulton, Kingston, Ont.; and Marie M. Hamilton, Ont.—are attending under a scholarship plan sponsored by the Provincial Council of Women of Ontario.

This is the school's eighth annual session. A prospectus says that "the educational program of lectures and workshops is designed for the needs of men and women engaged in professions or activities in which a thorough knowledge of the facts about alcohol problems will be of particular usefulness."

After two weeks of general background studies, students are divided into groups which will concentrate on the aspects of alcoholism they are most likely to encounter in their particular branches of work.

DISTILLERS ALONG About 145 students will take the course, to be held July 8-Aug. 4. They include educators, physicians, nurses, ministers, public health and social service workers, policemen and members of alcoholics anonymous. Ten representatives of the alcohol beverage industries also will attend.

Prof. Soliman D. Bacon, director of Yale's section on Alcohol Studies,

says Canada is sending its largest contingent yet—17 or 18 from Ontario, four from Quebec and three from other provinces.

He says his section was "particularly improved" by the interest of the Provincial Council of Women of Ontario, and especially by the recent statement dealing with alcohol to be taken in the field of alcoholism, education and rehabilitation.

All Parties Agree On More Pensions

Federal House Clears Way For Prorogation Of Session

OTTAWA, June 30.—(CP)—All parties in the Commons last night advocated better pensions for Canada's aged.

Clearing the way for prorogation today, members in 13 hours disposed of the remaining estimates of expenditure for the 1950-51 year. In the drive, attention turned briefly to the report of the parliamentary committee on old-age security.

That report advocated a \$40-month pension to all persons 70 and over regardless of means and financed largely out of employer-employee contributions. The report also suggested a \$40-month pension to needy persons in the 55-69 age group.

At present, the federal government pays 25 per cent of the cost of pensions up to \$40 a month and the provinces pay the balance. Some provinces pay supplements, bringing the pension in those provinces up to \$60 a month. To qualify a person must be 70 or over, a resi-

CARS BY THEMSELVES ARE NOT KILLERS

Most accidents are caused by Some HUMAN FAILURE

The modern automobile, given reasonable attention and care, is mechanically safe. But you can't always trust the man or woman at the wheel.

Most of the traffic accidents this season—by a wide margin—will be due to HUMAN FAILURE... not anything going wrong with the car itself. Drivers will fall asleep. They will pass on hills and curves. They will take their eyes off the road; they will do other foolish things, forgetting that the impact of collision at 60 miles per hour is precisely the same as driving a car off the roof of a fourteen story building.

Ted Williams Great Baseball Student

By Joe Reichler

BOSTON, June 30—(AP)—Ted Williams, the highest paid player in baseball, probably is the greatest student of the game. The Boston Red Sox slugger works at it, plays it, thinks it, lives it.

When he's in a batting slump he practices for hours. He'll stand for an hour in front of a mirror swinging a bat.

Ted knows more about opposing pitchers than any manager. He has become somewhat of a meteorologist. He studies the wind and air currents. He has made a study of the pitching mounds in every ball park.

PERFECT EYES
During the eight years that Ted has worn the Red Sox uniform, prior to this season, he has never failed to finish at the top or close to the top in these all-important departments of batting—average, home runs, runs batted in and total.

He has been four times winner of the batting crown, a possession of the third-highest batting average in the history of the game, four times run-batted-in leader, four times home run champion, five times leader in runs and perhaps, most significant, six times leader in walks received.

What makes Williams so great a hitter?
He has the keenest eyes (brownish green) in baseball. United States navy doctors said his eyes would occur only six times in 100,000 persons.

Williams has schooled himself not to swing if a ball is a fraction of an inch outside the plate.

FAST AS FLEET
He is deceptively fast. He is a good judge of a fly ball. He is a good judge of a line drive. He is a good judge of a bunt. He is a good judge of a hit.

Not a single Ted Sox player had a walkout word for Ted. Williams never had an argument on the field either with a pitcher or a manager.

King Feigner's Pitching Too Much for Pontiacs

By Ernie Federuk

When a pitcher strikes out 33 batters in 13 innings he's not just a big star at all.

That's the record of one Edward Feigner, a pitcher of a four-man staff, in two exhibition games the King and His Court played at Kingsway this week.

Last night King struck out 17 on the Court foursome trounced Pontiac of the Second Major League 8-4 before another large crowd.

BIG CROWD
Approximately 1,600 fans watched the good-looking righthander give a dazzling exhibition of softball hurling.

An enjoyable display of shadow ball was presented by the King and His Court after the game.

Jack Davies, Pontiac first baseman, batted 1000 against Feigner. Davies solved the King's offerings and collected three hits, including a pair of two-baggers in three trips to the plate.

The "old man" of the four-man staff, shortstop Gord Melnick, proved that he's not too old to wield a bat. Melnick clicked for five safeties in seven trips.

His collection of his included a towering fourth fly smash over the rightfield wall in the fourth inning. It was his second homer in two nights, having put one in almost the same spot Wednesday.

FOUR SPEEDS
Feigner used four speeds in his pitching. He pitched fast, slow, medium, and fast.

He never uses fastball in a game. It's his secret. He pitched fast, slow, medium, and fast.

He pitched fast, slow, medium, and fast. He pitched fast, slow, medium, and fast.

ATOM-SPLITTER JUMPS HIGH

LONDON, June 30—(AP)—Britain is throwing its best into an attempt to win an international track meet over United States athletes here tomorrow.

The contest sends the Oxford-Cambridge athletes against a combined Cornell-Princeton team at White City stadium.

It will be their 11th meeting since the series started in Princeton in 1935. A win by Oxford-Cambridge Saturday would tie the series at five apiece, with one draw.

Oxford's Roger G. Bannister won the mile last year, and the British fans think he will do it again.

The Oxford-Cambridge atom scientist event is Lewis W. Davies of Oxford, the British team's no. 2 high jumper. He has been doing research work on atoms while collecting his degree.

B.C. Senator Lashes At Money Ways

OTTAWA, June 30.—(CP)—Senator Thomas Reid (B.-British Columbia) made a last-minute protest in the senate today that no time had been allowed for study of supplementary estimates and charged that large amounts of money "are being slipped across."

"Not one senator knows what is going through," said Senator Reid, speaking during second reading of the government's supply bill just prior to prorogation ceremonies in the Upper Chamber.

The senate then gave second and third readings to the money bill, "no division"—a way of showing objection without a formal vote.

NEW WAY SEEN
The British Columbia senator said a "new way" of money was becoming apparent. Departments of government just "went on spending and then come back to parliament and it makes up the deficit."

Sen. Arthur Roebuck spoke for 35 minutes on the report of the human rights and fundamental freedoms committee of which he was chairman. The senate then adopted the report, recommending parliamentary adoption of a declaration of human rights as an "interim" measure until a national bill of rights could be written into the Canadian constitution.

Sen. W. M. Auldine, acting Progressive Conservative leader, said he thought the senate committee had "done a good job" of going through the estimates, but before them for the first time this year.

Man Falls 8,000 Feet From Plane Over Virginia

MIAMI, Fla., June 30.—(UPI)—A charter airline pilot fell from 8,000 feet today when he was sucked through the door of a C-47 while the plane which suddenly blew open during a flight northeast of Norfolk, Va., the Civil Aeronautics Board here reported.

The employee was identified as James T. Jones of Miami Springs, Fla., he was riding on a C-47 which was flying from Miami to Norfolk, N.Y. from New York to San Juan.

The plane stopped in Norfolk after the accident and later continued its flight here.

Atom Official Voted Down

WASHINGTON, June 30.—(AP)—The atomic energy committee voted 5 to 4 yesterday to confirm Summer T. Pike to a new four-year term on the United States atomic energy commission.

Mr. Pike, who is acting chairman, President Truman expressed his support for the committee's action, saying Pike had been one of the ablest members of the AEC.

Prorogation Speech Refers To Korea 'Peace Threat'

OTTAWA, June 30.—(CP)—The speech from the throne, read today at the prorogation of the second session of the 27th Parliament, referred to the "serious threat to peace in Korea."

The speech, which reviewed the legislative program of the session, also referred to various developments in the world situation, including the Korean situation.

The 136th word of the speech was read by Mr. Justice Paterson, clerk of the Supreme Court of Canada, acting deputy governor-general.

The government said the speech remains unchanged from last year's "gentle" speech, which was issued in the name of the prime minister.

The "gentle" speech was issued in the name of the prime minister, who said the government is determined to maintain the peace in Korea.

PRIDE OF RCN, three trial destroyers of HMCS Athabaskan class, including Athabaskan, will soon set sail for Far Eastern waters to lend support to U.K. and U.S. naval detachments in Korean war. Announcement to this effect came today from Ottawa as Far Eastern crisis worsened.

Canada And U.S. End Double Border Check

OTTAWA, June 30.—(CP)—Canada and the United States today agreed to eliminate some of the red tape which slows up travel between the two countries.

In a move designed to make international travel by air and sea easier, the two countries agreed to put a halt to "double" quarantine inspections formerly necessary for ships and aircraft visiting both Canada and U.S. ports.

The health department announced today that under new regulations, the quarantine will need to be carried out only once, either at the port of entry or at the destination.

The new procedure goes into effect July 1 and covers all ships and aircraft arriving in Canada and the United States from other countries.

WHAT'S COVERED
Public health quarantine inspections are performed at ports of entry to prevent introduction of communicable diseases by persons or by ships, aircraft or other things arriving from infected countries.

Of chief concern to health authorities are the "quarantinable diseases," such as smallpox, cholera, plague, typhus and yellow fever.

Previously, ships and aircraft arriving from infected countries had to undergo another inspection on arrival in the United States.

The other exceptions were those coming up the St. Lawrence river, on the Great Lakes and those entering the St. Lawrence from the Gulf of St. Lawrence.

In these cases, quarantine inspections are made by Canadian and U.S. officials at Montreal, Quebec and St. Lawrence.

Canada's new law, implemented at the St. Lawrence, Montreal and Quebec ports, will also apply to ships and aircraft arriving in Canada from the United States.

Doors Opening For Immigrants

New Regulations Reducing Red Tape Effective July 1
OTTAWA, June 30.—(RUP)—Canada today prepared to open its doors wider to immigrants, especially those from Britain, France, Ireland and the United States.

Immigration Minister Walter Harris told the Commons today that he had signed the new immigration regulations which become effective July 1.

These will cut red tape to help new settlers. The minister said under present laws many immigrants have to be admitted by special order-in-council, causing delays and discouragement.

The new laws promised easier categories of immigrants speedier admission to Canada. These were: Citizens of Britain, France, Ireland and the United States; relatives of legal residents in Canada; persons applying for permission to enter Canada to marry, provided they have support for their wives; agricultural, special workers; domestic and nurses' aides; and immigrants recommended by the settlement service of the immigration branch.

Immigrants from the British Isles will be encouraged by every means possible," Harris said.

REORGANIZATION
He reported that a reorganization of the immigration headquarters in London was in progress. In the near future it was expected to provide for medical examination, including X-ray, and the same service would be extended to France, where the immigration office would be encouraged.

Immigrants from the British Isles will be encouraged by every means possible," Harris said.

New Position For Vollans

J. H. Vollans, Northern Alberta Railway assistant superintendent, has been appointed assistant superintendent in Edmonton succeeding H. S. Bradburn, who is retiring.

Announcement of the retirement of Mr. Bradburn, on the company's pension plan, and the appointment of Mr. Vollans was made Thursday by J. M. MacArthur, general manager of the company.

Mr. Vollans entered the service of the N.A.R. in 1924 and since 1944 has been assistant superintendent at McLean, before joining the N.A.R. as a Canadian Pacific service for 23 years in British Columbia.

Mr. Bradburn, a native of Kelowna, B.C., entered the service of one of the component companies of the Northern Alberta Railway in 1915 and was soon promoted to conductor.

In 1942 he was promoted to his present position of assistant superintendent.

Mr. Bradburn, who is married, resides at 1121-1123 street.

Seedless Grapes Here To Sell at 40c Pound

By Bea Thrifty

Sweet song of the gourmet follows a tangy tempo of the seedless green grapes and their taste delights. Same seedless grapes arrived for local sales yesterday and are going, going, going at prices from 40c to 45c per pound. Sweet, succulent, with the sharp new-season tang, they're a treat indeed.

But they should be for that price...

I've been playing that very genuine game of "Ignore Something Hard Enough and It Will Go Away."

Meat prices have been my subject.

But meat prices, now at an all-time high just won't go away and ignoring them obviously isn't the answer to the problem.

New spring lamb is here... with a so-what price listing of 95c per pound for leg of lamb... and at the peak of the luxury class there's double-breasted shirts at \$2.00 per pound.

And beef... well... we've been mourning about that for ever so long and the situation is worse if anything. Seems a seasonal shortage is adding to the grief and prices are rocketing upward daily. T-bone steaks are out of the menu question at silly prices like 95c per pound.

Even beef liver is at a scandalously fabulous price. It's ridiculously high price of 45c per pound... imagine beef liver selling at the low price of 45c per pound. And the added price of it all is the poor butcher suffers as much and more than anyone. The result can mean to blame for meat and situation... in many cases for a while at least but a fraction of a cent more than cost. That is necessary to have his customers.

So Madame Housewife... we have a "Be Kind to Butcher" week.

It's frequently very difficult to quell our tempers when we see pork prices following the beef-veal suit. But seasonal shortages there shift the balance in the supply and demand game and result in higher prices. Too, pork has been upped 3c per pound in this past week which gives us loin chops at 55c per pound low.

The "a and i" series... and meat is the base source of vitamins. One type of bone marrow and bone is a staple part of diet and can be used in many ways. DOROTHY DIX SAYS

Social Error to Invite Boy In After Late Date

Dear Miss Dix: Should a girl ask a boy into her house when he brings her home at 2 or 3 o'clock in the morning?

The girl maintains there is an opportunity for conversation at the movies and subsequent party and that it is very inopportune to just go good night at the door.

Her mother says it is a social error to have a young man wait at that hour of the morning and that it will cause gossip.

Also, let it be very anything to those who are asleep in a small house.

Which one is right—the girl or her mother?

ANSWER: The mother, absolutely. It is the height of inconsideration for a girl to entertain men visitors at that hour of the morning, and after midnight.

It is a social error to have a young man wait at that hour of the morning, and after midnight.

Have You Tried A Sun Dress Yet?

A Bulletin Brief

Remember a long night's sleep a kip or basking sun or straps... evening gown or sun dress is one of the most wonderful tricks our fashion designers have learned in the last two years.

Typically sold on the bulletin board you dress myself, because if there were in a time when you don't want to dress across your shoulders, it is when you are trying to acquire a nice even coat of skin.

These are smartest in all white or in all black pique or linen this year. You could even wear one of these as a summer cocktail of terrace supper dress with an orange or bright colored thin chiffon stole to use as a summer coat if necessary.

TURNPIE

I can cook mashed turnip in cup milk for 2 eggs beaten in cup sugar to top, cinnamon to top, ginger to top, flour to top, salt to top.

Mix all flour, put in a crust and cook.

Legend Tells How Twilight Was Born

Today we will relate a legend of the world. The sky in the west where we look down upon the most beautiful of the world, it tells how twilight came to be and color to the sky.

Many years ago an Indian boy, who had no children, was walking along the shore of the Great Water in the west, where he found a tiny boy, curled up in a grasshopper. Because the boy was tiny and curled up in a grasshopper, the Indian boy named him the child of the grasshopper.

For three days the boy was always in the grasshopper and when the sun went down and the moon came up, the boy would come out of the grasshopper and play with the Indian boy.

One day the Indian boy was in the grasshopper and the sun was shining brightly. The Indian boy was so happy that he called the boy the child of the sun.

When the sun went down and the moon came up, the Indian boy was sad. He called the boy the child of the moon.

One day the Indian boy was in the grasshopper and the sun was shining brightly. The Indian boy was so happy that he called the boy the child of the sun.

When the sun went down and the moon came up, the Indian boy was sad. He called the boy the child of the moon.

Clock Is Dog-Sitter

By Jim Walker

When a dog is left alone in a house, it is often bored and lonely. A dog-sitter is a person who takes care of a dog when the owner is away.

One day a dog-sitter was taking care of a dog. The dog was very happy and the dog-sitter was very happy.

The dog-sitter was very happy and the dog was very happy.

The dog-sitter was very happy and the dog was very happy.

The dog-sitter was very happy and the dog was very happy.

The dog-sitter was very happy and the dog was very happy.

The dog-sitter was very happy and the dog was very happy.

The dog-sitter was very happy and the dog was very happy.

The dog-sitter was very happy and the dog was very happy.

The dog-sitter was very happy and the dog was very happy.

OLD SCHOOL GRAD. James C. Hornberger, Jr., of Succasunna, N.J., spent five years in Pacific war, and returned to grammar school at age 24. This year he graduated from Roxbury High School at age 29. He's seen with two of his teachers who are younger than he is—Mrs. Adelaide Taylor, left, and Mrs. Celeste Mendez. Hornberger, known as "Pop" to schoolmates, is headed for technical school.

LATEST PHONE FOILS EXTRA LISTENERS-IN

A new type of telephone that guarantees secret conversations between subscribers on a "party line" will be one of the exhibits of a London firm of telephone manufacturers at the 1950 Canadian International Trade Fair.
Called a "Seraphone," the instrument makes conversation to unauthorized listeners unintelligible by altering the frequencies of the speech tones.
The same firm will show loudspeaking telephones which allow undistorted speech to pass between them without the use of a "talk-line" switch.

Many Hazards Around House

Amateur auditors show that the most dangerous place of all in the home is the kitchen. It is the place where most accidents occur, and it is the place where most fires start. The kitchen is a place of many hazards, and it is important to be aware of them. The most common hazards are: 1. Stoves and ranges. 2. Dishwashers. 3. Sinks. 4. Windows. 5. Doors. 6. Stairs. 7. Halls. 8. Bedrooms. 9. Bathrooms. 10. Living rooms. 11. Dining rooms. 12. Kitchens. 13. Basements. 14. Attics. 15. Garages. 16. Driveways. 17. Lawns. 18. Gardens. 19. Pools. 20. Fences. 21. Gates. 22. Drains. 23. Pipes. 24. Wires. 25. Cables. 26. Antennas. 27. Radios. 28. Telephones. 29. Computers. 30. Other electronic equipment.

Curtain Rod Used To Ease Measuring

It is often difficult to take an exact inside dimension, as in a case where the window is not square. The solution is to use a curtain rod. The rod is placed in the window, and the measurement is taken from the rod to the wall. This method is much more accurate than measuring from the wall to the wall.

Cheap Way to Get 'New' House

With Sound Original Plan Houses Easy to Convert

Getting a new house without having to buy one sounds like something dreamed up by a magician. Yet, according to leading real estate appraisers, it's no trick at all. Whether your home is five years old or 35 it can be converted into a dwelling with an "effective age" of less than a year—provided the original design was sound and the upkeep has been adequate.

The key phrase is "effective age," which, as defined by appraisers, is that age in which good original planning, modernization of kitchen, baths, heating systems, etc., plus maximum upkeep, have tended to reduce the actual age.

MODERNIZING SECRET

The secret is modernization. The actual age of your house may run to 30 or 40 years or more, but a complete renovating job can turn the clock back and "make it a child again."

Obviously, it takes a thorough "new" plumbing installation, rewiring to convert a really old and light fixtures if necessary, according to an analysis by the A.M.A. (American Mortgage Association).

Any necessary repair work in place, here are the major steps re-chimneys, gutters, woodwork, etc.

1.—A new roof and an insulation job.

2.—Bathroom and interior painting and wallpapering.

3.—A new heating plant with automatic heat control.

4.—Modern kitchen, including built-in forms as new cabinets, refrigerator, stove, electric dishwasher and garbage disposal unit.

5.—A new tile bath, with six-complete renovating job can turn the clock back and "make it a child again."

GET A LINE ON THIS LINE, IT'S LINELESS

Managed if they haven't invented a clothesline that has no line!

It consists of a frame that's only two feet square, but provides as much drying space as 40 feet of regular line. Fifty-four spring clip clothespins are fastened to the sides of the frame.

The makers claim that the clothesline used wet clothes cause a downdraft of warm air from the ceiling to dry the clothes fast.

The frame can be attached to a wall anywhere and is light enough to carry in one hand. It folds compactly for storage.

As anyone might guess, it's called a "No-Line Clothesline." Riddle me another.

Depending on the house and its condition, there may also be various other items needing attention. New screens and storm windows may be necessary, for instance. The entire renovating job, however, based on a typical six-room house in a good middle-class neighborhood—would run to no more than around \$2,000, according to the Homeowner's study, probably a couple of thousand less.

Lawn Furniture Brightens Summer

Garden Furniture Makers Go to Town With Colors

Sun-worshippers all over Canada this year are in for a colorful as well as a bright summer. Ingenious folk who manufacture lawn and garden furniture appear to have gone to town during the past year—and what with the new aluminum tube frames, ray plastic, and fast-dye canvas they've produced functional furniture of the most comfortable kind.

Not everyone, however, cares to invest in such items. They may have been filled, and the primer or enamel underneath has been applied and given time to dry completely. Naturally, the more costly you apply, the more durable it will be.

Incidentally this year a white finish is particularly popular with canvas seating and backing in metal lawns.

As mentioned earlier, these may be in black, green, red or yellow. Any of the four show up strikingly against the brilliant white.

AWAY FROM STAINS
The trend seems to be away from the use of stain. It's advisable to finish and the pleasant color of the natural wood, a light stain may be applied to bring out the grain, and the whole piece should then be finished with two or three coats of a clear varnish.

If any streaking of color is evident, it is to be treated, a job of which it is to turn each piece up firmly on to the wall to fill the side down, pointing the last first, space behind the metal link. If the chair or table may then be important that the first layer is applied, and the job completed kept until for two or three days before the "stain" is cleared off.

After the paint or varnish is the same composition, it is applied to the back of the canvas may be placed in position before, it should be moistened and firmly secured. Special latches before the finish coat is added for such work are available at any of the many of Portland cement and hardware store. If the canvas is hydrated line usually forms the insect, but looks worn and faded. If finish coat which may be colored may be given a new life with a by the use of a marine mastic coating of special canvas paint. Application of the finish coat, which comes in an extremely plastic, should be carried out from top to the range of colors. This material bottom of the surface of the wall can be applied with an ordinary in one general direction. A sand brush and it does not stiffen the plate surface should be covered in one continuous movement.

WIRE BRUSH CLEANING
Metal surfaces which have rusted in spots should be cleaned with a wire brush or steel wool dipped in kerosene. Touch up bare metal.

For Perfect Patch Mix Plaster, Paint
To fill a crack or hole in a painted wall that you do not want to repoint, mix the patching plaster with paint of the same color. The plaster will be cleaned with a wire brush or steel wool dipped in kerosene. Touch up bare metal.

Screen Scraper Peels Paint
When you scrape down a piece of paint, wrap a piece of wire screen around a block of wood and use it like a sandpaper block. You can use a large area without digging into the wood. On boarding, you can scrape a face of one strip and the edge above in one stroke. A curved blade will scrape curved surfaces.

FIX-IT FORUM

Q—How can I color patch plaster to match a painted wall?
A—Use of the simplest way is to use patch plaster in an area of a few square feet. If the color is not perfect, use a color wash. If the color is not perfect, use a color wash. If the color is not perfect, use a color wash.

Stucco Good House Finish If Care Used

Stucco is a suitable house finish when properly mixed and applied. It is a mixture of cement, sand and water. It is applied in a thick coat and then finished with a trowel.

It should not be applied directly to brick. It should be applied over a concrete or galvanized metal base.

Waterproof paper is necessary over the sheathing of a wood wall. At least three-fourths inch furring strips should be applied over the waterproof paper.

Three coats of stucco are required. The first coat is the "scratch" coat. The second coat is the "brown" coat. The third coat is the "finish" coat.

After the plaster or varnish is the same composition, it is applied to the back of the canvas may be placed in position before, it should be moistened and firmly secured.

City Information List Saves Many Journeys

This suggestion from the city architect and building inspector's office will save prospective home-builders extra civic bike journeys in search of a building permit.

Building inspectors have prepared a list of minimum dimensions and information which must appear on plans before a permit can be issued.

Here they are:

SITE PLAN—
1. Site width.
2. Site length.
3. Front yard (minimum 30 feet).

VETERAN WITH CHILDREN who strives to attain home for his family has to consider problem seriously. To build small five-room bungalow without room for expansion will defeat his purpose. Proper accommodation must be combined with efficient and economical plan that minimizes work for mother. This house is suitable to meet these needs.

Exterior Materials Ready To Suit Variety Of Tastes

Like the clothing you wear, building materials vary in color, texture and durability. If you're the type who wears bold and flashy clothing, you'll probably build a yellow house with a green roof and red shutters.

But for the average man there is a variety of materials to give him solid, blended tones and of course, wood.

Wood shingles and siding are appealing. Made of cedar, they absorb moisture rain thoroughly. Soft greys and browns can be used in varying shades or a dull finish white paint can be used to give the effect of a lime wash.

GREATER BEAUTY
Adhesive plaster can be used to obtain equal or even greater beauty. They come in so-called breaded tones of grey that will not change with age.

And they have other advantages—they are fireproof and permanent and free from the recurring expense of repainting. They are useful in modernizing because they can be applied over old walls.

Housing Shortage Big Problem in Australia

SYDNEY, Australia, June 30.—(CP)—Greatest social problem in Australia today is the housing shortage.

In 1947, there was a deficiency of 137,000 homes. At the end of last year, the deficiency had grown to an estimated 212,000. In New South Wales—largest state in the Commonwealth—the shortage is estimated from 70,000 in 1947 to 90,000 at the end of 1949, although 60,000 new homes were built during the period.

Equally disturbing is the increased cost of building. A house here that cost £1,200 in 1946, is now £230 for land, in September, 1950, now costs £2,300 to £2,750. Many £500 for land from £100 to £200.

AVERAGE SUBURBAN HOME
The figures cover the average suburban home in Sydney or Melbourne consisting of two bedrooms, a living room, dining room, kitchen, bathroom, laundry, sun porch and five-car garage, built on a lot of about 50 feet by 120 feet and connected to gas, water and electricity.

The shortage—due to shortage of materials and skilled workers—is blamed for some serious financial tendencies.

IMMORALITY INCREASED
Most newswriters have to live with 100,000 for at least seven years after marriage. Psychologists all divorce courts say this is a sign of immorality for many divorces. Some writers are being paid more money than ever for their immorality.

LIFE PROLONGED
The life of old houses has been prolonged because no one wants to move.

Parliamentarians Review Session But Say They're In The Dark

By Noel Mostert
Exclusive to The Bulletin

OTTAWA, June 30.—(BUP)—Members of parliament left the capital today assured the nation was geared for war, but admitted they were almost totally in the dark concerning the government's defence plans.

Reviewing the defence debates of the 30-day session that ended with adjournment, the members found they had been given only three significant facts about defence:

1. The air force could cope with an aerial invasion;
2. The government had stockpiled almost enough equipment to carry the dominion through the first year of a war;
3. The navy could go into action within a matter of hours.

What other preparations had been made, the members found, were not published for security reasons.

One thing was clear, however. There was no doubt that Canada was ready to face an immediate emergency and that the armed forces were alert.

CLAXTON QUIET

Members' interest in defence increased as the international tension mounted and reached a climax in the Korean War. Defence Minister Brooke Claxton and his aides reviewed the government's defence plans, but despite persistent questioning by opposition leader George Drew for a full statement on the state of the dominion's defences.

Claxton claimed Canadian defences were better informed on their forces than were citizens of most other countries. He believed there was a limit on disclosing defence data, especially when national security was involved.

The minister remained invariable on that position. Before the MP's were through with defence, Claxton revealed that the air force was able to put a bomber in the air every half hour. Let the enemy take the pack and get their own wild cards. Why can't he be cured?

In such a situation, try to give the pack away early. Make the most dangerous dangers immediately.

There's no great harm in losing a small discard pile; but you don't especially want to lose a really big one. Even if the opponent manages to win several piles, that is better than letting them win one big one that contains just as many cards. Every time an opponent picks up the pack, he gives up the chance to draw from the stock.

By making him pick up several draws from the stock, it is from which he might get additional wild cards or red jacks.

Q—I had three jacks and two wild cards on the table. The pile was frozen. I had jacks in my hand to take the pile in case a jack was drawn. The player at my right threw a jack, and I wanted to take it. The opponents said that I would then have eight cards in my hand, and I would be out. They claimed that seven was the limit. Was this correct?

A—No. You must at least seven cards to make a canasta, but there is no rule against having more than seven.

Q—Are you allowed to take the mending at that same turn. A—Yes to both questions. You are allowed to take the mending at the stock and mend out, and you may or may not (as you choose) discard at this play.

Q—Are you allowed to freeze the pack only against the opponents—or is a frozen pack frozen for everybody?

A—A frozen pack is frozen for everybody.

Q—Are you allowed to freeze the pack only against the opponents—or is a frozen pack frozen for everybody?

A—A frozen pack is frozen for everybody.

47,000 Boy Scouts Gather For Jamboree

VALLEY FORGE, Pa., June 30.—(UP)—Boy Scouts from 18 countries opened their second National Jamboree today on the hills where George Washington and his troops spent the darkest days of the revolution.

The national colors and the jamboree flag—bearing the emblem of Washington kneeling in prayer—were raised on their masts amid the burning of aerial bombs to signal that the working campment of some 47,000 Boy Scouts was under way.

This was the greatest youth gathering in the history of the western hemisphere.

The president will arrive from Washington in a special train this evening and will tour the temporary

any city—larger than 20 state capitals—which spreads over 625 acres of rolling green hills. Then he will talk to the scouts in a large open-air arena on the grand parade ground.

Jamboree officials estimated that Mr. Truman's audience would be swelled by an influx of some 80,000 visitors.

The thousands of tents that stretch as far as the eye can see are set up on the same campsite where Washington and his troops spent the bitter winter of 1777-78 during the war to win this nation's independence. After Mr. Truman's speech there will be a pageant telling the story of Washington and his army at Valley Forge.
